

Design your own caterpillar

Caterpillars are insects, which means they have three body parts (head, thorax, and abdomen) and two antennae on their heads.

Most **caterpillars** are herbivores, which means they eat plants. **Caterpillars** eat constantly so that they can grow

Grow a caterpillar

Soak tights or a thin sock in water and add a mixture of soil and grass seed. Water daily and watch your caterpillar grow!

Caterpillars and Butterflies

Habitat Challenges

Make or decorate biscuits to look like a Caterpillar!

What delicious treats you use for your biscuits?

The Very Hungry Caterpillar ate lots of fruit!

Can you make a fruit salad?

What challenges do Monarch butterflies face today?

Watch the video and talk about it to your parents. Can you make a poster with the title:

Help save the Monarch butterfly!

Check out the video of the Monarch butterflies

<https://www.youtube.com/watch?v=AN8-pNvJ5s=bb1ysx40Wdo>

Where do the butterflies fly to?

How many miles do they travel?

How long does it take?

When do they travel?

Amazing! Watch this video
